Why we exist beyond money.

We exist to help ambitious hospitality brands turn WiFi into a powerful growth tool that builds long-term, valuable guest relationships. We make growth easier through outstanding service and constant innovation. We're partners, not just providers.

Where we're going.

To set the gold standard for WiFi marketing that others can only copy.

How we do business shapes our brand.

Effortless ease

We make complexity simple so our customer experience is as slick as possible. We remove friction at every step through our platform and support.

Trusted partner

We're loyal partners who treat your problems as our own. We build warm, long-term relationships by being flexible not rigid, going the extra mile and genuinely caring about your success.

Outstanding experience

We deliver an outstanding experience at every level of our service and never stop improving.

Bold innovators

We constantly push what is possible without fear of failure so we are seen as the leaders in our field.

Always honest

We're clear on what's possible and do what we say we'll do, when we say we will. We never make promises we can't keep. We're honest and transparent even when it's hard.

Louise Simmons

Louise is the marketing director of a multi-site, multi-brand hospitality business, leading a team of 6 marketers. She's an ambitious, natural leader with high standards who expects the same from those she works with.

As she works in hospitality, she also values warm relationships that go beyond transactional.

She wants a brand she's proud of across every touchpoint that also hits revenue targets. Success is based on customer satisfaction with her brand, how she compares to competitors and maintaining the sales to fuel constant expansion.

Her job is high stress and the biggest challenge is overwhelm. There are so many moving parts in a very fast-paced 24/7 environment with limited resources. Staying up to date in the digital world adds to the pressure.

She's tech-savvy but needs to delegate technical details. She needs minimal friction and partners she can trust to make her life easy, whilst delivering marketing ROI.

Turning customers into long-term loyal fans is essential to hit her goals.

To succeed, she needs providers who can scale with her growth without adding complexity.

Better support, more flexibility, key integrations and a stable platform are the main drivers to change providers. But change is always a headache so the upside needs to be worth it.

Louise Simmons

Insights

Greatest fear

Job security and being seen as failing. Her success and identity are tied to customer satisfaction with her brand, how she compares to competitors, and maintaining sales levels.

If she picks the wrong provider or can't deliver results, she risks her reputation and position.

Being burned by unreliable providers who make her look bad to the board and team is a constant worry.

Greatest challenge

Overwhelm with so many moving parts in a very fast-paced 24/7 environment. She's responsible for high turnover across multiple growing sites with limited resources and a challenging market.

Staying up to date with rapid changes in marketing, AI and hospitality tech adds to the pressure. She can't be an expert in everything her role covers.

Greatest desire

A brand she's proud of that delivers results and has loyal long-term customers. She wants to balance long-term brand growth with short-term board pressure. Turning customers into long-term loyal fans who have a two-way conversation with her brands is essential to hit her goals.

The only way she can achieve this is through delegating to people she trusts both internally and externally.

Louise Simmons

The buying journey

Problem aware

How they may became aware they have a problem.

- Unreliability of WiFi and CRM integration
- Missing key CRM partners
- Inflexibility and rigidity on contract and making changes
- Hard to contact support especially for service issues or making changes

Solution/product aware

How they may become aware of a general solution or our product.

- Word of mouth through direct network and community
- Digital channels - social and SEO/PPC
- Passed to IT person to research
- Recommendation from CRM provider and other tech providers

Objection

Their main objections for not purchasing.

- Lack of trust that provider is reliable, integrates well with CRM and offer good support
- Partner can't keep up with their growth
- The time/headache of switching no matter how easy it is
- Been burned before with bad experiences

Consider/purchase

The core reasons for considering & then purchasing.

- Connect with the team and IT is on board
- Speed of onboarding and quality of integrations
- Case studies from similar brands
- Flexibility in contract and service making customising easy and no long term commitments

Advocate

The experience they have that will make them want to tell others.

- Speed of set up/integration
- Ease and reliability of service/ platform with helpful new features added regularly
- Personal support that goes beyond expectations
- Great stats/results from opt-ins

David Doyle

David is an in-house IT engineer and his role is just as important as the marketing director for securing new customers. Either he's tasked with finding a provider or the marketing director passes it to him for technical evaluation.

David is security conscious and protective of his eco-system. New technology is often a headache, full of things that can go wrong, so he approaches with scepticism. His job security depends on reliability without a constant stream of support tickets.

This leads David to stay in his comfort zone. It's often easier to go with a built-in hardware provider or stay with the incumbent because he wasn't reassured that the headache of changing provider was worth it.

David needs responsive support, well-documented technical specs and stable security. Simplicity of setup that won't disrupt his eco-system is crucial, along with free trials and bench testing to build confidence.

Once he hands it over and everything works, his job is done and his goal is to do that in the easiest, fastest way.

The website needs to answer his concerns directly, showing how reliable and easy integration is, backed up with technical proof points and case studies from similar implementations.

David Doyle

Insights

Greatest Fear

Bad tech and support. If they recommend a provider that's unreliable or creates constant support tickets, it reflects on their judgment and threatens their job security.

Greatest Challenge

Balancing security and stability with the need to accommodate new technology. Every new integration is a potential headache and vulnerability in their ecosystem.

Greatest Desire

To recommend a solution that just works. Setup is simple, it integrates smoothly and once handed over then runs without generating support tickets and makes them look great.

David Doyle

The Buying Journey

Problem Aware

How they may became aware they have a problem.

- Current provider not responsive when issues arise
- Security concerns
- Integration difficulties including CRM partners
- Marketing director tasks them to find alternatives

Solution / Product Aware

How they may become aware of a general solution or our product.

- Web search
- Word of mouth
- Recommendations from hardware provider (often bundled solution)

Objection

Their main objections for not purchasing.

- Security SLAs - especially breach protocols and data protection
- Complexity of setup - is it weeks of work and back and forth?
- Will provider take ownership if things go wrong or blame them?
- Lack of confidence in provider as unable to test with a trial or unresponsiveness of team

Consider / Purchase

The core reasons for considering & then purchasing.

- Guaranteed responsive support with clear documentation
- Strong SLAs and proof it won't generate constant support tickets
- Simplicity of setup demonstrated through trial
- Evidence of smooth integration without ecosystem disruption

Advocate

The experience they have that will make them want to tell others.

- Setup was surprisingly simple - made them look good
- Once handed over, it just works with minimal ongoing tickets
- Outstanding support when issues arise
- All-in-one solution simplified their infrastructure

	Purple	Captive	Wireless Social
Strengths	• A lot of social proof with big brands and lots of case studies • Good social media presence and brand activations • Mission driven B Corp	• Clean and visually engaging site • All inclusive, transparent pricing • Founder has active online presence	• A lot of social proof and stats including Trustpilot review • The Access ecosystem for enterprise clients • Well known in hospitality
Weaknesses	• Generic, AI sounding copy that is feature led • Human/customer support element lost • Enterprise focus and not hospitality specific	• Lack enterprise size clients • Copy is functional, lacking personality • No case studies • Less features • No value proposition	• Copy is generic, jargon filled and corporate • Lock people into long term contracts • The Access ecosystem can turn off smaller brands as WiFi is not their sole focus
Insights	• Highlight customer support and the humans behind Fydelia • Focus on benefits not just features • Highlight hospitality focus • Make navigation clear	• Speak more to enterprise level clients • Show more case studies/testimonials • Create more valuable content • Lead with a strong value proposition	• Highlight Fydelia focus is WiFi and CRM, not anything else • Highlight flexibility, transparency and responsiveness vs corporate rigidity • Make case studies more detailed but also scannable

How we're different from the rest (short)

The short and long positioning statements are for internal use and explain what makes us different.

Our	Guest WiFi platform
Offers	A reliable, slick, user-friendly platform with outstanding support from people who care about your success.

How we're different from the rest (long)

We help	Multi-site operators
Who	Are overwhelmed managing growth
To achieve	Turning their WiFi guests into valuable, long-term customers
Unlike	Other providers with rigid contracts and impersonal service
Our Solution	Offers a reliable, slick, user-friendly platform with outstanding support from people who care about your success

Value proposition

This is how we describe Fydelia to our customers and can be adapted for different channels. The tagline is for when space is limited

The guest WiFi platform that turns your customers into superfans. With outstanding support from people who care about your success.

Tagline

Turn your customers into superfans

04 | OUR BRAND PERSONA

HUMAN PERSONALITY	4.1
CORE BRAND ATTRIBUTES	4.2
BRAND VOICE	4.3
LANGUAGE/VOCABULARY	4.4
VOICE GUIDELINES	4.5
VOICE EXAMPLES	4.6

Our human brand

Fydelia is the knowledgeable friend who genuinely cares about your success. They explain WiFi marketing in plain English without the jargon, then help you make it happen.

They're ambitious innovators who constantly push what's possible, but never lose the human touch. They're invested in solving your problems, even if it means going above and beyond.

They're honest, telling you what works and what doesn't, even when it's uncomfortable.

They're reliable - they do what they say, when they say they'll do it. They balance professional expertise with warm, human connection and make everything feel effortless.

Working with them is a pleasure and you enjoy spending time with them. They always take the time to listen and treat your business and problems like their own.

You can trust they always have your back.

Fears

- Becoming corporate/generic.
- Letting customers down.
- Being the last to innovate.

Desires

- Set the gold standard.
- Build lasting partnerships.
- Make customers successful.

Our human brand

Sage (40%)

- **Trusted**
- **Wise**
- **Knowledgeable**

The Sage is the trusted advisor who demystifies WiFi marketing. They openly share knowledge through clear documentation, helpful content and patient explanations.

Customers never has to guess what happens next as the Sage always knows what they need. They're always able to solve problems no matter how big or small.

This drives the educational, informative tone and positions Fydelia as the authority for honest, expert guidance without complexity or jargon.

Creator (20%)

- **Creative**
- **Imaginative**
- **Original**

The Creator is driven to constantly improve and build what didn't exist before, never satisfied with good enough. They thrive on new ideas and aren't afraid to try things that might fail. They love the process as much as the finished result.

This shows up in continuous platform development, bold marketing and a willingness to tackle complex problems others avoid. The Creator makes Fydelia the industry leader others try to copy.

Everyman (40%)

- **Friendly**
- **Welcoming**
- **Relatable**

The Everyman is down to earth and human. They genuinely care about customer needs and make their problems their own.

They're honest, dependable and create warm personal relationships that go beyond transactional. Customers never feel stupid asking questions.

This is the opposite of cold, corporate platforms that talk down to customers or drown them in jargon. The Everyman drives the partnership mentality and human connection that makes customers feel valued.

These attributes define who we are

Expert

Caring

Innovative

Honest

Ambitious

Reliable

How we sound

Tone *(our core voice characteristics)*

Friendly

Expression

We're approachable and warm without being overly casual. We write like a knowledgeable colleague, using natural language and not sounding like a corporate robot.

Knowledgeable

We're experts who share wisdom freely, not hoard it. We explain complex features in plain English. We back up claims with specifics and proof points. We answer all questions clearly and patiently.

Clear

We get straight to the point without unnecessary jargon or fluff. We structure information logically, use concrete examples, and make technical concepts accessible. If something can be said simply, we say it simply.

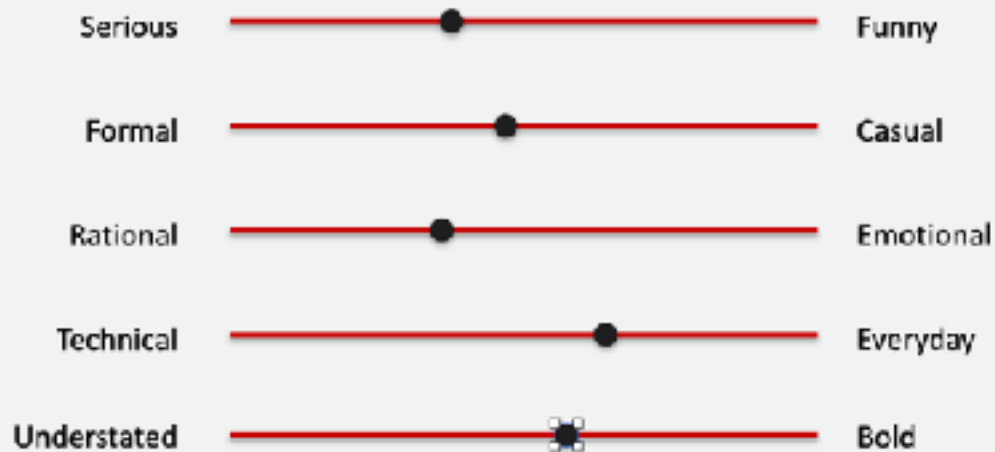

Confident

We know what we're good at and we're not shy about it. We make confident claims but only if we can back them up. We're the leaders in guest WiFi that others follow. We own it but without arrogance.

Playful

We take our work seriously but not ourselves. We'll use the occasional well-placed bit of warmth or lightness to keep things human. We're not cracking jokes or trying to be funny, but we're not stiff either.

The voice spectrum

Dimension (*the voice spectrum*)

Description

Humor:

We're lightly warm but mostly serious. We're not making jokes or trying to entertain but we can occasionally make people smile.

Formality:

We're professional but warm. We sound like a knowledgeable colleague, not a corporate executive. We never say anything we wouldn't say in a conversation but it's more casual professional than casual friend.

Emotion

We're primarily rational with emotional undertones. We lead with facts, proof points, and practical benefits. But we always reinforce with feelings and emotions.

Technical:

We're accessible over technical. We use everyday language unless technical terms are the only way to say it. Anybody should be able to understand what we mean.

Boldness

We're willing to make strong claims and show some personality. Bold but only for the most important things.

Language We Use

Guest WiFi platform	Straightforward	No manual work
WiFi login page	Responsive	Your problems are ours
2-way CRM integration	Fast	Grow with you
Trusted/Supportive partner	Personal	Responsive support team
We've got your back	Simple	If you want it we'll build it
Real people	Long term relationships	
Raving fans	Customers (clients)	
Plugs/flows straight into/ Sends data to	Guests (WiFi users)	
Actually works/Just works	Effortless	
Flexible	Human	
Based on your needs	Real people	
Slick	Easier	
No friction/frictionless	Best in class	
We'll sort it	Gold standard	
Exactly	We stick around	
Reliable	Make you look good	

Language We Don't Use

Enterprise	Actionable data/insights	Touchpoint
Unified platform	Deep	Zero hassle
Leverage - Corporate jargon	Implement	Redefines
Empower	Value add/add value	Sophisticated
Elevate your brand	Drive results	Ecosystem
Powerful way to engage	Boost engagement	
Cutting-edge	Transform your business	
Data-driven decisions	Personalised experiences	
Optimise	Advanced features	
Maximise	Innovative solutions	
Holistic approach	Growth tool/engine	
End-to-end solution	Accelerate growth	
Game-changing	Scale your business	
Outstanding customer	Underpins	
Dedicated extension of your team	Enrich/Enhance	
24/7 support desk	Intuitive	

What to avoid

Avoid vague improvement verbs - Don't use verbs that claim improvement without saying how (enhance, enrich, elevate, boost, optimise, maximise, streamline).

Avoid empty quality adjectives - Don't use adjectives that could apply to any product (robust, sophisticated, powerful, comprehensive, holistic, cutting-edge).

Avoid corporate passive verbs - Don't distance yourself from action with passive verbs (underpins, enables, facilitates, empowers, leverages).

Avoid corporate/technical jargon for simple concepts - Use everyday words, not corporate phrases (touch point → interaction, ecosystem → network, end-to-end → complete).

Avoid transformation claims without proof - Don't claim you redefine/transform/revolutionise unless you show how.

Avoid hyperbolic promises - Don't make absolute or extreme claims (zero hassle, endless growth, unlimited potential, completely frictionless).

The compound jargon rule - Mixing adjective with jargon word creates corporate speak even if both work individually (seamless + onboarding = jargon).

How to write

Be specific, not vague - Replace vague claims with concrete details and stats (fast setup → setup in 3 days and start collecting emails immediately). Describe actual outcomes, not abstract benefits.

Be direct, not passive - Use active, direct verbs (we'll sort it → not issues will be resolved).

Lead with benefit, not feature - Start with what the customer gets, then explain the feature.

How to write (cont)

Use descriptive adjectives, not marketing adjectives - Say what something is or does, not just how good it is (verified, flexible, real-time vs powerful, robust).

Short sentences for technical topics - Break down complex concepts into digestible chunks.

Use 'you' more than 'we' - Focus on customer benefits, not what you do.

Use 'we' language for partnership - Show you're working together.

Use plain English over jargon - When there's a simpler word, use it (WiFi login page not splash page).

Best/world-class only with specifics - Don't claim to be the best unless you specify at what and include proof (best-in-class email verification at 98%).

Real people language over corporate speak for support - Use human language about service (real people who pick up the phone, not dedicated customer success team).

Function over fluff - Explain what it does, then what that means (2-way CRM means no need for users to re-enter passwords).

Strategic principles

Don't criticise competitors - Keep it positive, focus on your benefits.

Focus on benefits over pain points - Lead with where they'll get to, not just where they are now (pain points are secondary). Don't prey on fear or be overly negative - focus on positives where possible.

Example 1: Feature description

 Our advanced segmentation tools empower you to leverage actionable insights and optimise your marketing campaigns for maximum engagement.

 Segment customers by venue, visit frequency, and spend. Send targeted campaigns that bring customers back more often.

Example 2: Service/support copy

 Our dedicated customer success team provides world-class support with seamless onboarding to ensure your implementation delivers results.

 Real people who pick up the phone. We'll get you set up in under a week and we're here anytime you need us.

Example 3: Integration/technical feature

 Our robust 2-way CRM integration seamlessly syncs data to enable personalised customer experiences and streamline your marketing workflows.

 Guest data flows straight into your CRM. Updates flow back automatically. No CSV exports, no manual work.

Example 4: Results/outcomes

 Our innovative solution helps hospitality businesses accelerate growth, boost engagement, and maximise ROI through data-driven marketing optimisation.

 Multi-site restaurants using Fydedia see 40% more repeat visits and build databases of 10,000+ verified guests in their first year.

Platform you can rely on**Key themes**

- Reliability
- Integration capabilities
- Technical expertise

Supporting content

- Reliability of platform.
- Integration partners.
- Ease of integration.
- Team tech expertise.
- Customer problems with previous providers.
- Your process to keep things reliable and secure

Supportive partner**Key themes**

- Personal/responsive service
- Flexibility
- Long term partnerships

Supporting content

- Approach to customer service.
- Going above and beyond to solve problems inc examples.
- Case studies of partnership approach.
- Simplicity/transparency of contracts.
- Showcase the team

Growth made simple**Key themes**

- Creating guest loyalty/ROI
- Understand your guests
- Innovative & user friendly features

Supporting content

- Constant feature innovation inc work in development.
- Focus on ease of use.
- Speed of set up and implementation.
- CRM that works.
- Sharing ROI case studies.
- Easy ways to increase sales with the platform

The one thing to be known for

Outstanding support from people who care about your success

Area	Proof points
Reliability	• Testimonials/case studies • Server back up so data never lost • Support is highly reactive • Systems to detect platform issues early • 99.9% uptime guarantee • Offloading - infinitely scalable architecture that easily scales regardless of growth volume
Personal & responsive support	• Testimonials/case studies • Clear SLA's with live support • Experience prospects have initially • Quality of interactions with team
Integration capabilities	• List of partners which are true integrations, not just Zapier • Time of integration takes days not weeks • Opt-in rates are 80%/increase in return visitors +8%/Other ROI stats • Zonal stats - 26% average non wifi opt-in and with Fydelia 75% average so we convert guests 3 times faster than other channels

Key things (cont)

Area	Proof points
Flexibility & customisation	• Building blocks that can be combined infinitely - if you want it we can build it • Can match your brand pixel perfect • Flexibility of contracts
Technical expertise	• Testimonials/case studies • Show the team • Content

Additional proof points

Area	Proof points
Speed of service	• Build splash pages in seconds with no forms to fill in (takes the same amount of time to fill in a form) • Best in class speed overall • Easily scalable system no matter how many clients on platform • Can grow as partners scale
Innovation	• Innovative features such as gamification • Splash page zoning - depending on location

The features to focus on

Feature	Benefit
AI splash pages	• Instant on-brand page that looks great and easy to sign up to - no waiting, no designers
Smart data capture	• Low friction login • High engagement - more opt-ins
2 way CRM integration	• Saving guests time by not refilling in forms • Proof of presence - marketing journey based on guest activity • Eliminating admin
Analytics & reporting	• Growth/ROI - proving the value of guest interactions beyond wifi sign up • Monitor marketing campaigns
Hardware integration	• Removing friction/headaches • Use your existing network - no additional hardware/support

Hook & introduction

Quick verbal pitches for networking, sales calls, and introducing Fydelia in person

Hook (Value Proposition)

Turn WiFi guests into valuable, long-term customers without rigid contracts and impersonal service

Introduction

I'm [YOUR NAME], [YOUR TITLE] at Fydelia.

We help multi-site hospitality businesses turn their WiFi guests into valuable, long-term customers without the impersonal service and rigid contracts from other providers.

We're a bit different because you get outstanding support from people who care and we're really flexible as you grow.

Setting the gold standard the others can only copy
